same as yesterday (7d avg: 0.0)	same as yesterday (7d avg: 8.9)	same as yesterday (7d avg: 102.3)	same as yesterday (7d avg: 1.0)

PAST ANALYSED CASES: WHAT CAUSED WHAT

Supplier 4 delivery late → Steel Rod 10mm below safety level

Observed steel rod 10mm below safety level on 20 Oct is consistent with supplier 4 delivery late starting on 20 Oct.

Partly seen · **Model check:** Model inconclusive (Computed just now) — Attribution completed within 5m cap; confidence threshold not exceeded.

Widget Model X orders late

Observed widget model x orders late on 20 Oct is consistent with widget model x orders late starting on 20 Oct.

No upstream explanation found · **Model check:** Model inconclusive (Computed just now) — Attribution completed within 5m cap; confidence threshold not exceeded.

FOCUS TOMORROW (TOP 5 PRIORITIES)

#	Action	Owner	Due	Reason
1	**Fix at the root: Supplier 4 delivery late**	Supply Chain Lead	Immediate	Observed steel rod 10mm below safety level on 20 Oct is consistent with supplier 4 delivery late starting on 20 Oct. (Confidence: Partly seen)
2	**Expedite delivery for SO-164 to Metro Distributors**	Customer Logistics	10:00 AM	1 units of Widget Model X are 18 days overdue (was due 02 Oct).
3	**Expedite delivery for SO-165 to Coastal Traders**	Customer Logistics	10:00 AM	16 units of Widget Model X are 17 days overdue (was due 03 Oct).
4	**Expedite delivery for SO-167 to Sunrise Wholesalers**	Customer Logistics	10:00 AM	8 units of Widget Model X are 17 days overdue (was due 03 Oct).
5	**Expedite delivery for SO-173 to Metro Distributors**	Customer Logistics	10:00 AM	13 units of Widget Model X are 11 days overdue (was due 09 Oct).

SUPPLIER WATCH

- **PO-18** (EastCoast Components): 407 units of Steel Rod 10mm — 67 days late (expected 14 Aug)

Framing: SAGE performs controlled synthetic causal-attribution evaluation under an expert-defined causal model; it does not claim to prove real-world causality.
