TODAY'S NUMBERS IN CONTEXT

Orders Due	Orders Late	Units Short	Materials Low
0	**0**	**10**	**1**
same as yesterday (7d avg: 0.1)	same as yesterday (7d avg: 0.0)	up from 0 yesterday (7d avg: 1.4)	up from 0 yesterday (7d avg: 0.1)

LAST 7 DAYS AT A GLANCE

Date	28 Jan	29 Jan	30 Jan	31 Jan	01 Feb	02 Feb	03 Feb
Late units	0	0	0	0	0	0	0
Shortfall	0	0	0	0	0	0	10

ORDERS TO PRIORITISE TOMORROW (TOP 5)

#	Order	Customer	Product	Due	Status	Reason
1	SO-22	Coastal Traders	Widget Model Y (10u)	04 Feb	Due tomorrow	Upcoming order requested on 04 Feb

SUPPLIER WATCH

No supplier problems today.

WHAT HAPPENED AND WHY (OBSERVED FACTS)

- Widget Model Y: Completed 10 units against 20 planned (10 units shortfall). (Seen directly in the data)
- Steel Rod 10mm: Closing inventory at 50 kg (1.9 days of cover, safety stock threshold 50 kg). (Seen directly in the data)

From past analysed cases, not detected today:

• **Supplier 1 delivery delay** (**Strong evidence**): 7-day supplier delay propagated into assembly starvation in past benchmark evaluation.

• *Evidence is limited: SAGE has been tested on simulated data.* View Trust section →

Framing: SAGE performs controlled synthetic causal-attribution evaluation under an expert-defined causal model; it does not claim to prove real-world causality.

Simulated data. System knows data up to 2025-02-03 only. • Generated at 06:37:54 UTC.
