# SAGE Daily Brief

Simulated data as of 2025-02-04

**ACTION NEEDED • 1 ITEM NEED ACTION**

## THE BOTTOM LINE

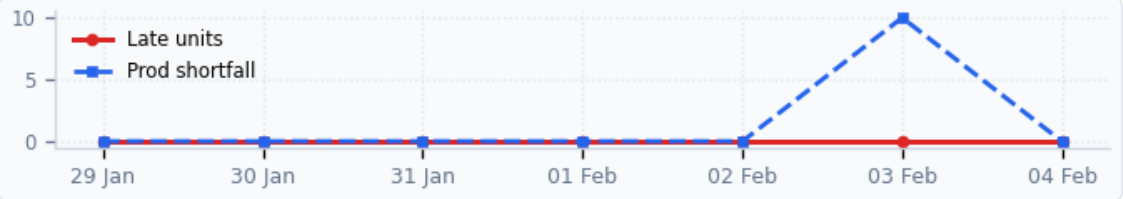

P I

## TODAY'S NUMBERS IN CONTEXT

| Orders Due | Orders Late | Units Short | Materials Low |
|---|---|---|---|
| **0** | **0** | **0** | **1** |
| same as yesterday (7d avg: 0.1) | same as yesterday (7d avg: 0.0) | down from 10 yesterday (7d avg: 1.4) | same as yesterday (7d avg: 0.3) |

## LAST 7 DAYS AT A GLANCE

• Late units • Prod shortfall

| Date | 29 Jan | 30 Jan | 31 Jan | 01 Feb | 02 Feb | 03 Feb | 04 Feb |
|---|---|---|---|---|---|---|---|
| Late units | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| Shortfall | 0 | 0 | 0 | 0 | 0 | 10 | 0 |

## ORDERS TO PRIORITISE TOMORROW (TOP 5)

| # | Order | Customer | Product | Due | Status | Reason |
|---|---|---|---|---|---|---|

*No customer orders requiring intervention tomorrow.*

## SUPPLIER WATCH

No supplier problems today.

## WHAT HAPPENED AND WHY (OBSERVED FACTS)

- Steel Rod 10mm: Closing inventory at 50 kg (1.9 days of cover, safety stock threshold 50 kg). (Seen directly in the data)

**From past analysed cases, not detected today:**

• **Supplier 1 delivery delay** (**Strong evidence**): 7-day supplier delay propagated into assembly starvation in past benchmark evaluation.

• *Evidence is limited: SAGE has been tested on simulated data.* View Trust section →

**Framing:** SAGE performs controlled synthetic causal-attribution evaluation under an expert-defined causal model; it does not claim to prove real-world causality.

Simulated data. System knows data up to 2025-02-04 only. • Generated at 06:34:27 UTC.
